### **Residents' Queries sent to CAC email**

- 10/10/25 Inquiry by Clinton resident, Rich Veith, regarding water level at Mud Pond “Mud (now, Crud)” Back in 2008 or so, a culvert was replaced between Mud Pond and Silver Lake on Slate Quarry Road. Rich felt that this work caused Mud Pond to become shallower and “muddy” over the years since. If possible, he wanted to learn why.
- 10/16/25 Inquiry by Gregory DeSylva – “Has the Town ever considered a ridge-line ordinance?” Barbara responded an email that had copy of the 250-15 Ridgeline, Scenic and Historic Protection Overlay District regulation along with the link to the Town Zoning eCode 360 found the town’s website. Charlie Canham of the Zoning Board was also on copy for the email. She suggested Greg contact Charlie for more information.
- 10/20/25 Inquiry by Tobias Picker on Schultzville Road regarding trees – “The two years in a row of spongy moths followed by last Spring's massive infestation of inch worms has decimated much of our forest - hundreds if not thousands of oaks have died after three straight years of defoliation. I can't say how many acres are gone but it's substantial.” Barbara asked Charlie Canham and Clive Jones for their help in advising the reasons behind the devastation. Barbara forwarded the email with both Clive and Charles’ responses to Tobias and to the CAC on 10/21/25. Unfortunately, there isn't a clear answer as there are environmental factors that come into play.
